A Story of Fifty Years

"Montreal, February 16.—Fifty years ago today incorporation of the Canadian Pacific Railway took place. George Stephen, afterwards Lord Mount Stephen, was the company's first president. The company deposited with the Dominion Government, at Ottawa, a cheque for \$1,000,000 as a guarantee that it would fulfill its contract to complete the railway to the Pacific Coast. This pledge was completed in five years instead of the ten the contract called for."

This brief but significant news despatch appeared in the daily newspapers of Canada on February 16 last. It recalls an historic incident, a milestone in the history not only of Canada but of the world. It not only carries the mind back, but because of all that backward glance discloses, it inevitably forces the mind forward to a contemplation of what the next fifty years may unfold. It impresses one with the tremendous developments and possibilities of a span of only fifty years.

Fifty years ago the project of a transcontinental railway across Canada was viewed with scepticism by thousands in Canada, and was regarded as the maddest kind of a venture in Great Britain. Men prominent in public affairs declared it would never earn its axle grease. The country it was to traverse was described as a wilderness, partly desert, incapable of successful cultivation and settlement by white men, followed by miles of snow-capped mountain peaks and ranges.

That success rather than failure followed the great undertaking can be credited to a few stout-hearted, far-seeing men who were veritable giants in energy, resource, and grim, unbeatable determination. In some respects they were ruthless; their methods were not always above suspicion, but they had a vision and a driving force to achieve their goal regardless of any and all obstacles. Individually they staked their all on the success of this enterprise, obliterated the word "failure" from their lexicon, and won. Canada, the world, knows the result.

The railway made a new nation. It opened up an empire. It altered the trade routes of the world. It brought the Orient to the Occident, and the Occident to the Orient. The enterprise initiated fifty years ago by a new-born Dominion of a few millions of people, has amazed the world. It has become the greatest transportation system in the world, with its fixed bands of steel not only crossing and criss-crossing Canada, and extending well into the United States, but with its vessels navigating the seven seas, culling at the ports of all nations, and circumnavigating the globe.

The Canadian Pacific Railway has helped to make Canada what it is. It has made and unmade Canadian Governments. The history of the Canadian Pacific is in part the history of modern Canada. The success of the railway has been bound up in the development, the prosperity, the success of this Dominion. The management of the railway has always recognized that fact, and it has been pro-Canadian at all times and in all its policies. It has made mistakes, of course; it has been selfish, even dictatorial at times, but it has always been magnificent.

The Canadian Pacific has been created and developed under the presidency of four men, Sir George Stephen (later Lord Mount Stephen), Sir William Van Horne, Sir Thomas (later Lord) Dufferin, and Mr. Edward W. Beatty. The history of the railway may likewise be divided into four periods, or possibly three as the first two merge into one. First the period of organization of the company, early financing, and actual construction under Stephen and Van Horne; second, the period of well organized, highly efficient operation under Shagnessy, with well defined policies of branch line construction as feeders, opening new territory, and the establishment of new service lines, and common services; third, and coupled with a vigorous continuation of the Shagnessy policies, what may be termed, in the absence of a better word, the diplomatic period under Beatty wherein up-to-date railroading has been strengthened by securing the goodwill, the admiration, the co-operation of the public generally, and the elimination of those feelings of suspicion and antagonism which undoubtedly marked the relations of the people and the railway in the earlier days.

And in the story of these fifty years is there not a lesson and an inspiration for the people of Canada? The railway had its periods of difficulty and depression, just as individuals and nations experience them, but it surmounted them. The workers of the Canadian Pacific did not shorten their vision to a year or two, or five or ten years; they looked into the future and planned and built with courage and confidence. They have had their reverses, but they should the Canadian people maintain the forward look, act with courage and decision, remain confident, Canada has done great things in the past. It can do greater things in the years to come.

Honored By Italy

F. C. Elford Appointed Member of Executive For Fifth World's Poultry Congress

F. C. Elford, Dominion Poultry Husbandman and Past President of the World's Poultry Science Association

tion, under whose auspices the World's Poultry Congresses are held, has been signally honored by the government of Italy, who appointed him a member of the executive for the Fifth World's Poultry Congress which meets in Rome in 1933. Mr. Elford has also been asked to take charge of organization of the Canadian delegation to Rome. From present indications the next Congress will fully equal the success of last year in London, England.

Telephones in Canada

The estimated number of conversations by telephone in Canada during 1929 was 2,525,500,000, including 37,821,000 long distance calls. For every 100 of the population in that year there was an average of 15 telephones.

A Scientific Mystery

Source Of Cosmic Rays Has Not Been Discovered

Discovery of cosmic rays in sunshine—the same rays that penetrate about 700 feet into earth—is described in advices received at New York from Vienna.

The communication is from Prof. E. Spath, president of the Chemical and Physical Society, and is sent to clear a misunderstanding about the report made recently to the society of Prof. Victor F. Hess, of the University of Graz.

Vienna despatches had it that Professor Hess announced the discovery of cosmic rays and that his talk created a sensation among scientists. But Prof. Spath points out that Dr. Hess did not claim to have discovered cosmic rays, which were found 18 years ago, but that he had evidence that a small percentage of these rays come from the sun.

Their origin has been one of the great scientific mysteries. The fact that most electroscopes used to detect them showed as many at night as in the day was held by some scientists to eliminate the sun as a source.

BREAKS UP GAS IN THE STOMACH

Don't suffer from dangerous gas pressing around your heart, from nervous acidity, or from indigestion. Stop worrying. Whenever you need quick stomach relief, take a little of this famous Mucousin powder or tablets. It breaks up gas, neutralizes acids and keeps the stomach active and content. Gas dissolves in perfect. At all good drug stores.

Cancer Research

Ontario To Supply Free Treatment To Sufferers

Within the next two months, possibly before the present legislature prorogues, the Ontario cabinet will make public the nature of the investigation into the cancer question to which it has committed itself. The cancer treatment, whatever it may be and whenever adopted, will be supplied free to sufferers, Premier George S. Henry stated.

Ontario led the way in the distribution of free insulin for diabetes treatment. It followed this with the manufacture of a free serum for combating infantile paralysis, and several other treatments for diseases are also available to the general public at cost. Now the government will make available, free, the cancer treatment that will eventually be adopted.

Should the government decide on investigation by commission, it will have, it is believed, the assistance of the Ontario Research foundation. At the present time the foundation is understood to be making further investigation into the value of radium ore from Halbathorn township.

One of the most effective vermifuge on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

It may be mixing metaphors, but the man who puts his shoulder to the wheel seldom has to put his nose to the grindstone.

Protect the child from the ravages of worms by using Mother Graves' Worm Extirminator. It is a standard remedy, and years of use have enhanced its reputation.

More than 21,000 cafes serving foreign foods have been opened in Japan.

To Test Hudson Bay Route

Would Increase Initial Grain Movement To Not Less Than 5,000,000 Bushels

Asking that Federal Government through Hon. Dr. J. Manion, Minister of Railways and Canals, give due consideration to the advisability of increasing the initial grain movement to not less than 5,000,000 bushels in order to adequately demonstrate the Hudson Bay route as a "valuable and necessary trade outlet for export farm products," the Saskatchewan traffic council unanimously passed a resolution to that effect.

For Cataracts.—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from cataract will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

The man with a private grievance usually becomes a public nuisance.

Four-fifths of the automobiles owned in Brazil were bought on time.

Soviet Plan a Failure

Engineer Says Five-Year Idea Has Entirely Collapsed

Philip Hartly and Mrs. Hartly, of Newark, N.J., stepped down the gang-plank of the liner New York and heaved hearty sighs of relief. They were back where shoes cost less than \$50 a pair, and butter not quite \$6 a pound. They had come back from Russia.

Hartly, mechanical engineer, who went to Russia last August to investigate rolling mills in Siberia, had much to say, and little of it was complimentary to the Soviet or the so-called five-year plan of social and industrial rehabilitation.

"The five-year plan is not collapsing," Hartly remarked. "It has collapsed. The people are in rags. There is depression everywhere."

The Family Doctor

The family doctor is coming back, says a physician who has been making a national survey of the medical situation. He has been ignored lately in favor of specialists on one hand and self-doctoring on the other.—Brookton, Mass., Times.

Valuable Information Secured As To Habits and Movements Of Migratory Birds In West

The value of a more intimate knowledge of the habits and movements of the migratory birds of this continent in the advancement of conservation and protection is widely realized. In Canada, the United States and Mexico wild life conservationists are co-operating in a study of the lines of migrational flight of the different species as they pass northward to Canada for the annual breeding season and again southward to the winter feeding grounds. Of all the birds protected under the term of the Migratory Birds Convention between Canada and the United States, ducks and geese are probably the best known. Both sportsmen and wild life lovers are intensely interested in the propagation of these species, the former for the sport they provide and the latter for the opportunities for observation and photography.

The waterfowl supply is not only of interest to Canada, but also to our neighbors in the United States and Mexico. It is estimated that between seventy-five and eighty per cent. of the ducks and geese of North America are raised north of the Canada-United States boundary. A very large share of the continent's duck supply is hatched in Manitoba, Saskatchewan and Alberta. During the last few decades great changes have taken place in the southern parts of these provinces where the most important of the duck nesting grounds are found. Settlement and agricultural development have curtailed the breeding areas, and when dry conditions prevail, shrinking the shallow lakes and marshes, the effect on the duck supply of the continent is marked.

The opinion has been frequently expressed that if the ducks were driven from their prairie breeding ground by the necessary invasion of agriculture they would just retreat to some northern fastness to breed. A study of the known breeding ranges of most of the species of ducks of Canada which are of interest to the sportsman shows that most of northern Canada is outside of the breeding range for these species, and it would be exceedingly unlikely for prairie nesting species to nest elsewhere. That large part of Canada which is covered by the pre-Cambrian shield is not essentially a duck breeding area. However, investigations are under way to find exactly how important this vast section of Canada may be in the production of ducks and whether its usefulness in this connection can be improved.

The geese are more essentially northern breeders than are the ducks and that may be why races of Canada geese as well as other species of Canada have maintained their numbers so well, even in the face of very persistent pursuit and hunting in the more southern parts of the continent.

In an effort to add to the store of knowledge concerning ducks and other waterfowl throughout Canada, the Department of the Interior has enlisted the voluntary co-operation of several hundred waterfowl observers. Each of these observers reports upon the status of waterfowl in his area during four periods of the year and tells in general terms whether ducks or geese were plentiful, fairly common or scarce. He is further invited to comment on changes which have occurred in the abundance of waterfowl over periods of years and to state the cause for any change if possible.

"Yes, I am a tolerant man, and anybody who dares to tell me I am a black eye," Mocha, Warsaw.

W. N. U. 1878

By this census system, very valuable statistics have been gathered and the work still continues. It has been used to substitute definite knowledge for guesswork in the recording of waterfowl conditions in the various parts of Canada. There is room for additional observers, especially in some parts which are not well covered at present, and any person who is interested in birds, and feels that he can add materially to the knowledge of the Department respecting waterfowl conditions is invited to communicate with the Commissioner of National Parks, Department of the Interior, Ottawa, Canada.

A Recent Discovery

Vitamin "D" Can Now Be Put Into Bread

Charging ordinary bread with vitamin "D," a vital food element which prevents rickets, and builds up bone and general health, is now possible following a discovery made by research workers in the Toronto hospital for sick children. Announcement of the discovery was made recently.

A few months ago workers in the same laboratory found a way to impregnate biscuits and these have been on the market for some time.

The Horse In Town

Although Used To Automobiles They Are Still Bewildering

They tell us that the city is no longer a fit place for a horse. He does not now, as he did 20 years ago, stand on his hind legs, snort and paw the air at sight of an automobile, nevertheless these contraptions that go along with no visible supply of legs keep him in a constant state of bewilderment, apprehension and brain tag. He feels precisely as a woman does who has no card-ense and yet tries to learn contract bridge. It is all beyond him. All he can do is to stagger on and suffer. So you would think that the effort to keep horses in the cities would be abandoned. But it seems that there are occupations in which the horse manages even now to hold his own against his rival, the gas engine. The milkman, the iceman, the huckster, the junkman, all of whom make house-to-house stops, find the horse-drawn vehicle convenient and economical.

A milkman's horse, once he has learned his route and knows his master's voice, moves on or stops at a word, or a whistle from the curb, while the reins lie slack over the dashboard of the wagon. The automobile has yet to be invented that will beat a horse at that.

Canadian Made Boots

According to the latest official figures the total production of leather footwear in Canada for the eleven months ended November 30 last year, was 16,023,190 pairs, or an average per month of 1,456,654 pairs.

FASHION

No. 107—Outstandingly Smart. This style is designed in sizes 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 2½ yards of 39-inch material with ½ yard of 25-inch contrasting.

No. 138—Youthful Tunic Frock. This style is designed in sizes 14, 16, 18, 20 years, 22, 24 and 40 inches bust measure. Size 14 requires 2½ yards of 39-inch material for blouse with 2½ yards of 39-inch material for skirt and sash and 1½ yards of 25-inch lining.

No. 564—Smart Jacket Suit. This style is designed in sizes 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 2½ yards of 39-inch material for blouse with 2½ yards of 39-inch material for coat and 1½ yards of binding.

No. 884—For School Days. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 2 yards of 39-inch material with ½ yard of 39-inch contrasting.

No. 179—For the Toddler. This style is designed in sizes 1, 2, 4 and 6 years. Size 4 requires 2½ yards of

39-inch material with ½ yard of 25-inch contrasting.

Spring, the season of prettiest styles, will soon be here. Prepare now by ordering a copy of our new Fashion Magazine. Attractive styles for women, misses and children. And instructive in sewing.

Price of book 15 cents. Send 25 cents in stamps or collect to Fashion Bureau. Write fully and plainly your name and full address, the number of the pattern and the size you want.

Dairying and Mixed Farming In Western Canada Assisted By Tree Planting Movement

During the planting season of 1930 there were sent out from the forest tree nurseries of the Forest Service of the Department of the Interior and planted on farms in the Prairie Provinces more than 6,000,000 little trees—seedlings and cuttings—bringing the grand total of trees so supplied and planted since this work was begun by the Department in 1901 to over 116,000,000. Figures so large as this require to be analyzed before their significance can be realized. To enable them to be more easily visualized it may be stated that this planting stock has been sent out to over 100,000 applicants and a careful review of the returns of the Forest Service inspectors shows that in spite of all opposing causes—fire, flood, insects and insects—80 per cent. of all plantings set out on the Canadian prairies under this plan in the last thirty years are now flourishing and vigorous. These thriving plantations cover 32,000 acres or 50 square miles. The area covered might be pictured as a strip of forest a mile wide stretching from the western limits of Winnipeg to the eastern outskirts of Portage la Prairie. Such a strip would be small in the vastness of the prairies, but a comparison like this would not be fair because the plantations are strategically placed for the purpose intended in the very best positions. A comparison of the total area covered by the total number of plantings shows that the average plantation is 1,335 square yards or nearly half an acre in extent.

There is another point that must not be forgotten. The plantations recorded are only those for which the planting material was sent out from the Forest Nurseries Stations at Indian Head or Sourthern, but once a plantation is established it becomes a source whence seeds and cuttings are drawn to start plantations on other farms in the neighborhood. Thus it has been found that the work goes on with increased pace with each new yearbreak set out. The mainpraying of the tree-planting movement is to increase the production of the home-stand and the comfort of the dwellers in the farm home. That production of grain crops is increased has been amply proved and the windbreaks about the farm home and barnyard add to the comfort of the family and to the protection of the live stock.

Of late years there has been a marked tendency toward the diversification of the products of prairie farms. Dairying, the raising of poultry, and beekeeping have made important gains and these and other new lines of activity have been assisted by the tree-planting movement. The establishing of gardens—a direct result of the introduction of shelter-belts with the consequent producing of tender vegetables and bush and tree fruits, has resulted not so much in adding to the variety of commodities the farmer has to sell as in increasing the number of things he has for his own use. The strawberries, raspberries, tomatoes, melons, plums and apples now grown by many prairie farmers in their tree-sheltered gardens are not largely sold, but they improve the dietary and increase the health and pleasure of the farm dwellers. An analysis of the reports of the inspectors showed that on the 7,600 farms visited during the year, 6,800 had well kept gardens, 2,700 had plots of small fruits, and 400 carried orchards containing fruit-bearing trees. A prairie housewife in years gone by who "cleared another five acres of wheat and lay your vegetables and fruit," but the returns of recent years show that the farmers are realizing that it pays better to grow these things in the farm garden.

All the benefits of prairie tree-planting set out above are material and have a cash value. There is the other side that of sentiment—which, though it cannot be reduced to dollars and cents, is very powerful. The automobile is now a very common means of travel and if anyone who thinks that sentiment does not count with our farmers will keep his eyes open on a motor trip through any part of Canada he will soon see by

the dignified and appropriate names which our farmers give their holdings that they regard their places not as factories but as homes. And the two subjects with which the names most frequently deal are trees and views—Maple Lodge, Cedar Grove, Elm-ville, Oak Knoll, Forest View, Fairview, Shady Lawn, Poplar Point. Everyone will recognize these as typical farm appellations and the recurrence of these and similar names can only mean that the farmer is greatly affected by his surroundings and that his contentment in particular is increased by having trees about his home. These benefits, material and of sentiment, are doubtless the causes why for thirty years, in good season and bad, season, the tree-planting movement has continually spread. Applications to receive trees for planting in 1932 are now being received by the Superintendent, Forest Nursery Station of the Department of the Interior at Indian Head, Saskatchewan, and those interested will receive full information as to the plan on application.

Estonia Enters Exhibit

Will Take Part In World Grain Show and Conference

Official announcement has been made from the headquarters office of the World's Grain Exhibition and Conference, Regina, of the official acceptance of the invitation to participate in this world-wide event of 1932 by the minister of agriculture of Estonia on behalf of the government of that country.

Mihkel Pili, chief of the plant-breeding station at Jogevo, Estonia, has been appointed by the minister of agriculture as the representative of Estonia in charge of the exhibit which that country will prepare for the exhibition and conference. The Estonia Republic is situated on the eastern shore of the Baltic Sea, south of the Gulf of Finland. The total area of the country is about 18,350 square miles and the population was recently stated to be 1,116,563 people.

With the acceptance of Estonia of the invitation to take part in the 1932 Grain Exhibition and Conference at Regina, 14 countries have now definitely stated their intention to take part, namely: Italy, Peru, Yugoslavia, Guatemala, New Zealand, Czechoslovakia, the Netherlands, Belgium, Poland, Siam, India, Portugal, Switzerland and Estonia.

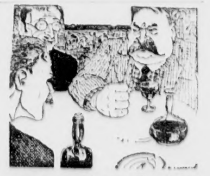

Advance In Grain Shipments

Shipments From Vancouver Nearly Double That Of Last Year

Shipments of grain from the port of Vancouver during the present crop year, which began on August 1, 1930, are nearly double those for the corresponding period in the 1929-30 crop year. From August 1 to January 15, 1931, total shipments amounted to 25,139,551 bushels, an increase of 16,500,884 bushels over the first five and a half months in the previous year. Of the total shipments of grain in the crop year under review 34,780,945 bushels were wheat.

Vancouver has in recent years become an important grain-shipping port. Much of the grain from Alberta is shipped to the British Isles and European ports via Vancouver and the Panama Canal.

The Liberty Bell was first cast in London, England, in 1752.

LOCAL & GENERAL

Scratch Pads may be obtained at the Pioneer Office, 2 for 5 cents.

Mr. and Mrs. W. J. Hilliard, and Mr. and Mrs. J. Boorman spent Sunday at Olds.

A General Hospital for sick Watchers, Clocks, Phonographs, Sewing Machines, Etc., Etc. In front corner of Club Lunch. All work guaranteed.—Adv.

On Saturday last, Norman Clarke returned from Winnipeg, where he attended the National Dairy Council meetings. He has been a director on the dominion board since it was organized nine years ago.

C. H. Carver, a former Didsbury boy, has joined the staff of Fraser & Sons, landscape gardeners at Pasadena, California, as a garden adviser. His new position will entail the giving of information on any subject pertaining to gardening.

Confirmation service was held in St. Xavier's Anglican Church on Friday afternoon. Bishop Sherman of Calgary, assisted by Rev. W. H. Cripps, rural dean, of Red Deer, and Rev. W. J. Archer performed the ceremony. The following were the candidates confirmed: Misses E. Bishop and K. Biedler, and Messrs. F. Bishop, R. Gulliver, and J. Rupp.

The Auction Sale held at Mrs. E. Y. Wood's place southeast of town on Friday last, attracted one of the largest crowds ever seen in this district. The prices obtained were surprisingly good. A count was made of the cars and it was reported that 282 cars and trucks and 14 horse-drawn vehicles were parked around the buildings. It is estimated that over one thousand people were present.

The opera, "Cherry Blossom" presented here recently by the Olds United Church Choir so successfully will be staged in Didsbury Opera House on Friday night, Mar. 27th. Didsbury people are in for a rich musical treat, that is assured. There is much comedy in the opera, and the luring airs, rousing choruses, and amusing situations make it a delightful evening of refined entertainment. Admission prices are set at: Adults 25c, and children 25c. It is expected many from Olds will make the trip to Didsbury to see this musical play for the second time.—OLDS GAZETTE.

A valuable silver fox led its owners (Hanson Bros.) and party a merry chase over the north-west district, after it had obtained freedom by its cunning from its lair on Sunday morning the 15th. The fox hunt terminated however on the discovery that Mr. Reynolds had been killed by another band of hunters who had trapped the animal at large near a farmhouse. It is possible in the excitement, that the hunting party did not give thought that it may have escaped from either of the two fox farms near town, and the set was close thinking it to be of the wild species.—OLDS GAZETTE.

C. E. REIBER

Judicial Sale of Farm Property By Tender.

Pursuant to the Order for Sale and the directions of the Master-in-Chambers, Edmonton, Alberta, sealed tenders will be received for the purchase of: S. 1 sec. 33, T. 1, R. 27, W. 4th N. except out of S. E. q. 2. 2.1 acres more or less and out of S. W. q. 2. 2.1 acres more or less. All for roadways 569 B. 31. The land herein containing 310.98 acres more or less, comprising into the Vagary & Edmonson Land Co. Ltd. all mines and minerals and subject to the conditions and reservations contained in the original grant from the Crown or in the existing Certificate of Title and subject to all taxes, rates and assessments imposed subsequent to the 1st day of January, 1931. The vendor is informed that the S.W. q. 2. 2.1 acres more or less and 2.1 acres more or less could be broken. These shall be fenced.

The S.E. q. 34 has 133 acres under cultivation. Three acres are fenced. All the land is about 8 miles from Allington station and 2 miles from a school. There are no buildings on the lands.

Tenders may be made for the full section or for each quarter section separately. The highest price for the S.W. q. 2. 2.1 is \$1,200.00 and for the S.E. q. 2. 2.1 is \$2,400.00.

Tenders must be in sealed envelopes, marked "Tender to C. 2163," addressed to: A. Y. Blain, Esq., R.C.M., Master-in-Chambers, Court House, Edmonton, Alberta, and must be in the hands of the said A. Y. Blain not later than 11 o'clock on the 1st day of April, 1931.

TERMS OF SALE: Each tender shall be accompanied by a marked cheque or cash for 10% of the amount of the tender and the balance of the purchase price shall be paid (unless the time is otherwise extended) into court within 60 days after acceptance of tender without interest, or in the alternative, the purchaser shall execute a mortgage for the sum of \$20,000 on the S.W. and S.E. q. 2. 2.1 which shall be a 1st charge on the land and the remainder of the purchase money shall be paid into court within 60 days after acceptance of the tender without interest. The mortgage shall be for a term of 5 years, payable as follows: the sum of \$750.00 on the 1st day of October in each of the years 1931, 1932, 1933, 1934 and the balance on the 1st day of December, 1935 and shall bear interest at the rate of 8% per annum, payable yearly. If the mortgage is at all the said, then the annual payment shall be \$200.00. The deposit of 10% shall be forfeited by the successful tenderer if he refuses to carry out the purchase after acceptance of his tender. Cheques of unsuccessful tenderers will be returned to them immediately after auction closes. The highest tender not necessarily accepted. In all other respects the terms and conditions of sale will be the standing conditions of sale of the Supreme Court so far as same are applicable hereto.

For further particulars apply to: A. G. BRADLEY-MCCREY, BARRISTER, COURT HOUSE, EDMONTON.

Dated at Edmonton, Alberta, this 16th day of March, 1931.

APPROVED: A. Y. BLAIN, R. P. WALLACE, C.S.C.

Canada Must Win World Championships

World Championships in 1932 will be won by farmers who recognize that the cleanest and best quality seed with most careful cultivation are essential to the production of exhibition grain. While it is recognized that these things apply to the whole crop area, concentration upon a small plot in the best soil for seed corn is especially important. If such a plot is subjected to extra preparation—such as the whole crop area—then it is to be devoted to seed it will not only produce a good quality foundation stock for next spring's seedling, but a winning sample for exhibition at the World's Grain Exhibition and Conference.

The grain world exhibition and conference is expected to attract thousands of Canadian farmers, the two advantages of clean seed stock, and the opportunity to see the best of Canadian crop production—these are the main attractions of the World's Grain Exhibition and Conference. The main attractions of the World's Grain Exhibition and Conference are the two advantages of clean seed stock, and the opportunity to see the best of Canadian crop production—these are the main attractions of the World's Grain Exhibition and Conference.

Mountain View Notes

Mr. A. Cook is busy on the land. Everything points to an early spring.

Messrs. Ernest Cullen and Jack Winterbottom were Olds visitors on Saturday.

Miss G. Hill returned to Calgary following her recuperation after her recent illness.

The monthly meeting of the W.I. was held Thursday, March 19th, and various plans were discussed for a fall bazaar. A good paper on Canadian industries was given by Mrs. W. Condes, her topic being "The Sugar Beet Industry in Alberta."

Wives! beware of very pressing invitations to accompany your husbands to the granary to get a load of grain. One unsuspecting lady thought her husband unusually kind when he induced her to go along. Instead of a few minutes' ride to and from as she thought it would be, he filled the truck with grain and proceeded to another granary where stood a world machine. The truck was hooked up and grain shovelled into the strange-looking apparatus. The lady was invited in to observe the cleaning of grain and another young lady of a curious frame of being along too proceeded to turn the wheel and at intervals helped to use the shovel. In this way, the endearing man received great help, as the shovel was casually handed over and both ladies assisted in the first process of cleaning grain. Is your grain all cleaned? If not, think twice before accepting a kind invitation to the granary.

RUGBY NOTES

The Rugby "Cheer Up Club" held their usual whist drive at the home of Mr. and Mrs. Hoesgood, there was a fairly good attendance and a very enjoyable evening was spent. The Club will hold a dance on April 1st in Rugby school. As the proceeds go to the aid of some sufferers from a recent fire, it is hoped for a good attendance. All ladies are asked to bring lunch.

The monthly meeting of Rugby W.I. was held at the home of Mrs. Farran. Owing to stormy weather it was two weeks late and there was a very small attendance. Our bread contest was postponed till the April meeting, when we hope for good weather, a full house and many voices of bread. After the business session, Current Events were given by the secy. and "Household Economics" taken up by Mrs. H. Jackson. A St. Patrick's Day contest finished the afternoon the prize winners being Mrs. Bolton and Mrs. Hoesgood. The meeting closed with the singing of the National Anthem and lunch was then served. Next month the W.I. will meet at the home of Mrs. J. Clarke.

4 Years without HEADACHE

How do you deal with headaches? Do you just take something to deaden the pain without getting rid of the trouble which causes the pain? Thousands do, they do the medical profession's warning cry of "DON'T!" Such makeshift methods simply suppress the symptoms of headaches. They merely numb the nerves and leave the underlying cause to look after itself. And it only obtains a finer grip. Headaches can generally be traced to a disordered stomach and to the unexpended retention in the system of slugging waste material which poisons the blood. Remove these poisons, prevent them forming again, and you'll never have to worry any more. And that is just how Knesechen's long soft and lasting relief from headaches, Knesechen's Salts and Nature to cleanse your body completely of all slugging waste material.

For many years I suffered from severe headaches almost daily. I started taking the small dose (of Knesechen's) a matter of four years ago, and I can honestly say I have never had a headache since. (Mrs. M. W. W.)

FREE TRIAL OFFER

If you have never tried Knesechen's try it now at no expense. We will distribute to you many small "GIANT" packages which make a year for you to prove or return. Ask your druggist for the new "GIANT" 15c package. This contains our regular 15c bottle together with a separate trial bottle—sufficient for one week. Open the trial bottle first, put it to the test, and then, if you are not satisfied, Knesechen does everything we claim it to do, the regular bottle is still as good as new. Ask a bank. Your druggist is authorized to return your 15c, immediately and without question. You have tried Knesechen free at our expense. What could be fairer? Manufactured by E. G. Griffin, Chicago, Ill., Manufacturer, Big Rapids, Mich. Sole Importers: McLaughlin Bros., Ltd., Toronto.

WORLD HAPPENINGS BRIEFLY TOLD

The Earl of Bessborough, newly appointed governor-general of Canada, will sail for Canada on the Canadian Pacific steamship, "Duchess of Bedford," on March 27.

Lieutenant-General Bernheim, of Belgium, who commanded the Belgian troops on French soil during the great war, died recently in Paris.

Lord Bledisloe, governor-general of New Zealand, requested that his official salary be reduced ten per cent for the public interest. Premier Forbes gratefully accepted the offer.

The sum of \$100,000,000 has been added to Great Britain's debt fund by the House of Commons, which accepted recommendations of Rt. Hon. Margaret Bondfield, Minister of Labor, for new unemployment loans.

Emile St. Godard, The Pas, Man., won the best time prize in the three-day New England dog derby championship at Lescroix, New Hampshire. His brother, Leo, won the handicap time prize.

Russian winter wheat acreage is estimated by the United States Department of Agriculture, to have increased 19 per cent over a year ago, when the area was estimated at 25,372,000 acres.

Great Britain's tragic dirigible R-101 is to fly again, in spirit. The Zeppelin works at Friedrichshafen, has bought the metal remains of the ship and will melt them down to be fashioned into parts for the new German dirigible LZ-129.

Developing Personality

Complexity Of Pattern That We Are Weaving Day By Day Throughout Life

What is this subtle thing called "personality"? How much of it does a man bring into the world with him and how much is due to other factors such as education, early environment? An attempt at a scientific description of what constitutes personality was made at an "adolescence conference" held at Cleveland, Ohio.

It has been said that an individual's personality reflects not only himself and his experiences, but the nature and experience of his family, his race, and his species. If, in fact, personality consists of the sum total of all the reactions of the individual, it may be divided into two groups—first, the general endowment of the individual, and second, the reaction patterns developed in utilizing that endowment in the environments in which he finds himself.

The endowment consists in what he brings into the world with him, nervous system, stature, form, strength, aesthetic qualities, instincts and tendencies more or less innate, that are common to his peculiar race. And his reaction to environments depends much upon his endowment.

The investigation of cultural factors in the development of personality has produced a number of books of value such as "The Unadjusted Girl," a study made by W. I. Thomas, and "The Jack-Roller, a Delinquent Boy's Own Story," written by Clifford B. Shaw. The latter volume is a document of nearly 200 pages written by the youth himself and showing the process of change from the social type of the criminal to the social type of the law-abiding citizen.

Personality goes deep. It began to appear in the lower forms, but came to fuller flower in the higher animals, the personality of dogs and cats being too well known to need mention. Man, of course, shows the greatest variety, resulting in the dramatic play of human life as we know it. Personality is the Latin word for "mask," the thing one speaks through. The individual—the real man—lies deeper. The personality results from the attempts of the individual, with whatever endowment he may have, to meet adequately the needs of the environment. Many of the reaction patterns established in childhood persist, but with greater age, many of the old reactions must be discarded and new and strikingly different reactions utilized. Adjustments to social, business and family life become necessary.

It is a complicated pattern of a personality that we are weaving day by day throughout life. What we finally attain is not only for ourselves, but for the general good or evil. Some consideration of the pattern would seem to be the sensible course for a reasonable being.—Minneapolis Journal.

Police In Canada Efficient

Law Enforcement In Canada Is Worthy Of Praise

It would appear from a survey of a report recently issued by the Canadian Government Bureau of Statistics for the calendar year 1929, that the police and law enforcement officials in Canada are on to their jobs.

Statistics collected from cities and towns having a population of 4,000 and over show that in 138 such centres with a total population of 3,359,703 the number of police officers employed was 5,994; one officer to every 671 persons. Summonses issued for infractions of the laws during the year numbered 168,932; and 127,627 arrests were made, an average of 23 arrests per officer. Offences reported to the police numbered 329,496; there were 263,532 prosecutions, 213,324 or about 81 per cent, of which resulted in convictions. Of the 11,160 automobiles reported stolen, all but 10 or over 99.9 per cent were recovered. The value of other goods stolen was \$2,296,972, and the value of goods recovered was \$1,225,089.

Canada's Electric Railways

Electric railways in Canada carried 836,729,851 passengers in 1929.

Praises Irish Linen

His Majesty King George Makes Purchases In Belfast

"I prefer Irish linen and every shirt I have comes from Belfast," said His Majesty, when, with Queen Mary, he visited an exhibition of the Linen Industry Research Association in London, England.

Examining table linen that had been washed in various laundries, the king remarked: "Some laundries do use up linen, but I suppose when it comes back with holes it is good for trade."

His Majesty has just placed several acres of the royal estate at Sandringham, Norfolk, under cultivation for flax, though most English land-owners say that flax takes more out of the earth than it yields.

Persian Balm—There is nothing like it for cooling and preserving a lovely complexion. Cooling, caressing—it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Persian Balm. A velvet's smooth lotion, it makes the skin rose-leaved in texture. Recommended also to soften and whiten the hands. Truly a peerless toilet requisite for every woman.

American Films In Britain

Eighty-Five Per Cent. Of Motion Picture Films Shown In England Are Of American Origin

Eighty-five per cent. of the motion picture films shown in England are of American origin, and only 7 1/2 per cent. British, Colonel John A. Cooper, president of the Motion Picture Distributors of Canada, testified before the investigation into affairs of the motion picture industry in Canada at Toronto. Investigation is centered around affairs of the Famous Players Canadian Corporation and its subsidiary companies.

Only about 50 Canadian pictures had been made since 1918, Col. Cooper stated.

Canadian Yellow Birch

Yellow birch is commercially the most important hardwood in Canada, forming more than one-third of the hardwood lumber produced in the Dominion.

Leprosy Being Cured

Eleven Patients Recently Released From U.S. Institution

Quietly, as ships long docked slip out into a strange sea, nine men and two women have left the government leprosy hospital at Carville, Louisiana, to face a world which some of them have not seen for two decades. Each carried a treasure which money could not buy—a certificate attesting they have been cured of leprosy, a disease dreaded and shunned since Biblical times.

Some will take new names and make new lives—the government will ask no questions. Their departure—brightening the hope of 330 other patients—will bring the total number to be released in the last few years to 83.

Increase In Oil Production

Alberta Oil Production Is Decidedly On The Up Grade

Oil production in the Province of Alberta is decidedly on the up grade, according to the figures for 1930 recently compiled by the Provincial Government. The total output in 1930 was 1,433,844 barrels, compared with 990,123 in 1929.

The production for the month of December, 1930, was the largest for a single month that has yet been made in Alberta, 175,572 barrels, a gain of 81,318 over the corresponding month of the previous year. Most of the oil produced in Canada comes from Alberta. The Province of Ontario accounts for 125,000 barrels of the total production.

When Food SOURS

About two hours after eating many people suffer from sour stomachs, they call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless liquid, pleasant, efficient and harmless. But it kills excess acids. It has

remained the standard with physicians for more than 50 years.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get genuine Phillips' Milk of Magnesia prescribed by physicians for over fifty years in correcting excess acids. 50c bottles—any druggist—The genuine is always a liquid—it is never made in tablet form. So look for the name Phillips on wrapper and bottle.

Make Your Windows Pay

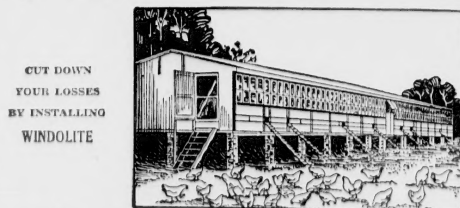

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

CHAPTER XI.—Continued.

Halliday's clenched hands trembled. He was remembering a time when he could not have gazed upon her thus without a longing to lay his cheek against her own. No such desire stirred him now. Her beauty seemed, almost, a repellent thing. His face quivered as he looked at her; but at last, with a sigh of weariness, he turned away and went to his own room.

For a week Nick's life hung in the balance. The fearful chill of the cold ride—the strain on his nerves—the terrible fatigue, had done their worst; and had it not been for the clean young strength of him, pneumonia would have claimed him for a victim.

"He's got only a fighting chance, Gay," said the old doctor honestly, while the look in his eyes nearly broke her heart. "But Nick won't go under without a fight. Now's the time, my dear, when he'll be repaid a thousandfold for leaving his well-oiled unswerving. He's sound and strong, and he has a lot to live for. We'll pull him through if it's a human possibility."

Gay hardly saw her babies in those days. With Julie's help she dressed them every morning, and after breakfast Janet Garnett (John Maxwell's youngest daughter and Gay's girlhood chum) came on a visit with her own baby, took them in charge, keeping them happy through the long days, and returning them at night, ready for bed.

"I'd keep them nights and all, Gay, if I didn't know you'd be happier to have them here," said Janet understandingly. "Mother says not to worry about dinner for tomorrow. She'll send down enough for everyone. Oh, Gay, I wish we could do more."

Gay couldn't speak. This was the third day, when things looked very black indeed. A second nurse was installed now, and Chuck Simpson was staying at the Bakersville Hotel, spending his time between Gay's garden, where he paced back and forth like a caged beast, and John Maxwell's house, where he took a sad pleasure in helping to keep the babies happy.

An atmosphere of gloom pervaded the First National Bank.

"Gosh!" exclaimed Johnny Symmes, whose cage joined Nick's, "what if he don't get well? I saw Doc Bennett this morning, and he said—"

He broke off suddenly, and began an attempt at whistling that deceived no one; while two stenographers openly wiped their eyes. The First

National Bank was about as cheerful as a mausoleum.

Gloom also pervaded the house of Halliday. After five days Angela said she could stand it no longer.

"I believe I'll go to the shore. Between hearing you at the telephone calling up the hospital about that child—and the sight of that horrible old man pacing up and down that garden, I'll go crazy. I think I'll go to Narragansett for a month."

"You will do no such thing," James Halliday spoke quietly, but with decision.

"You may be heartless, Angela, but for the sake of decency you shall not behave so, when, because of your own actions, the man is at death's door."

She drew an angry breath. "You blame me for everything. It wasn't my fault that that stupid child ran in front of the automobile."

"No, but you shouldn't have been there, Angela. Considering the errand I had gone on, would it have hurt you to stay quietly at home?"

"What good would it have done me to be bored all day? No one in Bakersville knew your mother."

He turned away, then said, his back still to her: "Who were the friends whom you expected to join you on your trip?"

"Friends?" Her voice was a little breathless, and her eyes dropped as he wheeled and faced her.

"What do you mean?" "I mean that Hastings understood you expected company to take this trip; and that you didn't wish to drive the new car yourself."

She struggled. "Where did you get all that?"

"That's neither here nor there, but—"

"You got it from that stupid little woman," she said scornfully. "Probably he concocted the story so she'd let him go. I didn't suppose he was so clever."

"Hastings is not a liar," said her husband quietly.

"And am I?" Her eyes narrowed; but Halliday merely turned and left the room.

Slowly, doggedly, Nick fought his way through "the valley of the shadow."

"He'll pull through," now," said the doctor quietly, "provided he has no set-backs, and we'll see that he doesn't. He's sleeping quietly and naturally. When he wakes, Gay, you can sit with him a while; but you mustn't talk. These children cry if you want to. It's been a hard week—hard on all of us. Gay, I'm going to stand at the bank on my way home, and let 'em know the way is over."

But the doctor's progress down Main Street was very slow. People hailed him from many a doorway, and went more happily about their tasks at the good news.

"Everyone loves Nick," he mused as he started his car for the fifth time in a half mile. "He's a good boy; but I can't help wondering why he was out of that day with Mrs. Halliday. There's child cry if you want to. I don't know women. Her eyes are too innocent for truth. But she's mighty pretty! Don't know when I've seen such a pretty face; though I wouldn't mind if she'd take it away from Bakersville for good and all."

She did take it away, for a time. Two days later, when James Halliday returned from a trip to a distant

PILES

PAIN STOPS LIKE A FLASH!

for months, Nothing helped me. I believe I'll go to the shore. Between hearing you at the telephone calling up the hospital about that child—and the sight of that horrible old man pacing up and down that garden, I'll go crazy. I think I'll go to Narragansett for a month.

hospital he found a violet-scented note in his wife's place.

"Now that our neighbor is out of danger, I suppose I may get the change I need. You gave me little enough sympathy after that terrible experience; but then, I didn't expect sympathy from you. I'm going to Rye. Don't look for me for a fortnight, or longer, but send a check first mail."

"It's just as well," said Halliday to himself, as he dropped the missive in the waste basket. "It may be a relief to Mrs. Hastings to know she's gone."

But in truth, Gay had no thoughts, unkind or otherwise, of Angela Halliday. In those days of anxiety and dread she had forgotten her. Now, in the joy of seeing Nick come back to life, nothing else mattered.

"There's a lot to explain," he said on the first day he was allowed a word or two, "but I haven't the strength for it now. If you'll just keep on trusting me—"

"I'll trust you forever and ever," she interrupted, and he said:

"I know, dear, I've known it all the time; but there's something I've got to ask or I can't rest. A terrible thing happened on that trip, Gay. I must first tell you—"

"It's all right, Nick," she broke in quietly. "The car is living." Mr. Halliday told me. He's been to see the little thing. Oh, my dear, everyone has been so wonderful! Now that you're getting better I—I feel that these terrible days have been paid for almost in human kindness."

He smiled, and would have spoken, but she said: "Wait, Nick, I haven't finished. I've been finding out that what your mother told you is true as truth. When the way seems hardest we do seem to reach a hill-top, a place where we can breathe again, and see life and—and everything, with a new vision. I can't say just what I mean, perhaps, but I feel that I've reached one of those hill-tops now. Life will lead us into the valley again, I know; there'll be suffering, and trouble, and doubts, and anxieties to live through; but I shall always be richer for the dearth of those who tried to make this hard time easier. Don't you believe that, Nick?"

"Oh, Gay," he answered, "if I could only keep you on the hill-tops! But—"

but as I look back at things I see that all your troubles come through me."

She related, the first care-free smile in days lighting her eyes: "Have you thought where I find my joys?" (To Be Continued.)

Carbon Monoxide May Have Killed Explorer

Stefansson Believes Andre Overcome By Fumes From Snow

Vilhjalmur Stefansson, writing in the "Spectator," lifts a corner of the curtain which enshrouds the death of Salomon August Andre, who never came back from his polar balloon expedition of 1907.

Andre and K. Franckel, whose bodies were found in the Arctic wastes last August, were overcome by the subtle fumes of carbon monoxide as they sat about a kerosene stove in their virtually air-tight tent, Stefansson believes.

He developed his theory from evidence discovered on White Island, where the bodies of the explorers and the remains of N. Strindberg, another member of the expedition, were found. He almost died himself of the cause, Stefansson writes, in an Eskimo snow-house on Coronation Strait 20 years ago.

Where the Fumes Are "After all, the city government is just like a tree—we officials are merely the branches, but you people are the roots and the trunk." "Aye, true," spoke up one son of Erin, "but ye must admit that all the plums grow on the branches."

"I know where you can get a chicken dinner for 15 cents."

"Where?"

"At the feed store."

Libraries In Canada

Hundreds Of Libraries Give Readers Free Access To Good Literature

Supplementing the work of the various educational institutions of Canada are hundreds of libraries in different parts of the country. In a list of 1,025 for which statistics have been collected, 623 are free public and association libraries, 126 are university, college or normal school, 52 are Dominion or Provincial Government libraries, and 224 are otherwise classified. Legislation making some provision for public library accommodation exists in each of the provinces, as well as in the Yukon; and all of the larger centres of population have libraries free to all. Smaller settlements, especially those in frontier places, such as mining and lumber camps, are reached by travelling libraries under the management of the Provincial Governments, or universities. In each of the provinces legislation is in existence to facilitate the establishment or expansion of libraries in the public schools, and many of these institutions have very considerable collections.

Diver Likes Synthetic Air

Increases Efficiency Says Well Known Submarine Engineer

"Synthetic air," composed of helium and oxygen, is a means of sustaining the respiration of deep sea divers, has received the O.K. of Captain Sloan Danenhower, widely known submarine and salvage engineer.

Captain Danenhower, who will command the Wilkes' submarine "Nautilus" on its undersea dash to the North Pole this summer, made a diving test at the Philadelphia navy yard in which "synthetic air" was used instead of Mother Nature's atmosphere.

"The advantage of using helium-oxygen," he explained, "will increase the efficiency of divers as to the depth they can go, the time they can work under the surface and the speed with which they can go through the decompression process."

After 10 Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

A Real Celebration

Here's a short story on longevity. Mrs. C. H. Jones, 80, of Cornwall, Vermont; Mrs. Lucy Crane, 90, and Mrs. John J. James, 78, both of Weybridge, went to Levittown, N.Y., to help their 100th birthday sister, Mrs. Elizabeth Jovett Sewell, celebrate her 100th birthday. All four sisters are in excellent health.

CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

Little Help For This Week

"He heathen the broken in heart, and bindeth up their wounds"—Psalm cxlvi. 3.

Then sorrow, touched by Thee, grows bright.

With more than rapture's ray, As darkness shows its worlds of light We never see by day.

— Thomas Moore.

Wherein is the blessedness of those that mourn? Christ says, in being comforted, in the victory of their faith, in the endurance of love, trust and patience. Remember until we are thus comforted in our hours of sorrow we are not one with our Leader, nor in communion with our Father's Spirit. No one will suppose that the blessing of affliction consists in the suffering it brings. It consists in the spiritual response to suffering of one whose confidence is in the source of love. John Hamilton Thorne.

Soft corns and warts are ugly, painful and irritating. Remove them quickly and surely with Douglas' Egyptian Liniment.

A naturalist points out that there are more than 500,000 kinds of insects, and most of them make no sound that a human being can hear.

HEAD HURT?

WORK won't wait for a headache to wear off. Don't look for sympathy at such times, but get some Aspirin. It never fails.

Don't be a chronic sufferer from headaches, or any other pain. See a doctor and get at the cause. Meantime, don't play martyr. There's always quick comfort in Aspirin. It never does any harm. Isn't it foolish to suffer any needless pain? It may be only a simple headache, or it may be neuralgia or neuritis. Rheumatism, Lumbago, Aspiration is still the sensible thing to take. There is hardly any ache or pain these tablets can't relieve; they are a great comfort to women who suffer periodically; they are

always to be relied on for breaking up colds.

Buy the box that says Aspirin and has Genuine printed in red. Genuine Aspirin tablets do not depress the heart. All druggists.

Burnside Notes

There will be a Grand Concert in the Lone Pine Hall on Friday March 27th. The program will be put on by Bancroft, Selkirk, and Hawkeye schools assisted by Lone Pine talent and promises to be extra good and a dance will follow. This is the last of the season, and everyone is urged to make the most of the opportunity to hear something real good.

Mrs. Bert Pross, Helen, Lester and Marjorie spent Sunday with Mr. and Mrs. Sam Elliott.

The death occurred at Edmonton, Sunday, March 22 of Mr. George Saunders. Being in ill health for some time, he seemed to be improving but passed away quite suddenly following an acute convulsion. He was born in Prince Edward Island 41 years ago, one of the twin sons of the late Matthew and Mrs. Saunders. The family removed to Iowa about a year later making their home there for about 10 years. Thirty-one years ago they came to Alberta and farmed for some time in the Olds district, later moving to their present home in the Stuart school district. In February, 1930 he married Miss Kate McIntosh, of Calgary who survives him, with an infant daughter three months old. Two brothers survive, Percy and his twin brother William, also two sisters, Mrs. Mike Sheridan of Peace River and Mrs. Wm. Doyle of Munson. Of a quiet, pleasant disposition he will be much missed, having taken part in many of the sports of the district and played on the Burnside Horse Shoe Team for some years, also the Didsbury Curling team. The funeral took place on Wednesday morning at Trochu and was largely attended by old neighbours and friends.

Melvin Notes.

Miss Marjory White is spending a couple of weeks in Banff.

Miss Eva Good from Hope Mission, Edmonton, is spending a week at her home.

Mrs. J. Good of Garfield, spent last week with her sister, Mrs. P. Johnston and her parents Mr. and Mrs. Troyer in Didsbury.

Plays and dance at Melvin school last Friday night were well attended, we noticed a number from town there, we hope everybody enjoyed themselves.

The Club social hour next Saturday night will be conducted by Doreen Farrant and Gladys Carlson.

A number of returned men and their families attended the social evening at Zella, Friday night. All report a good time. This is the first we have heard of the Canadian Legion out this way, but we will be looking for more social evenings, why not at Melvin sometime.

Westcott Notes.

Miss Mildred Levagood spent the week end with her parents.

Miss Alice Rennie is a visitor at the old home this week end.

The Literary Club held its last meeting Friday night with a full house.

Mrs. Rinehart is in the hospital, ill with inflammatory rheumatism.

Miss Lulu Tiftworth, of High River is visiting her sister, Mrs. Ed. Klink.

Mert Stringer says he is very busy these days. Batching seems to agree with him.

Miss Rona Tuggle, Frank Good and Eva attended services at Bergen, Sunday evening. Good luck Frank!

Leslie Bernard, who has been visiting friends at Westcott for the last two weeks, has returned home.

Mrs. and Mr. McMurray have purchased another quarter section of land at Westcott inside the town limits.

Local News

Mrs. W. Lyons left on Saturday for a visit to Toronto.

Mrs. A. G. Studer and Winnie left last week for a short visit to Vancouver.

English Watches. Grandfather Clocks, and Chimes. Everything Ancient and Modern. Bring it to W. Monteith, North End Jeweller.

Mr. H. Howe, of Three Hills, and Mrs. J. Sheila left for Vancouver on Monday to attend their brother's funeral.

Mr. W. Leadbetter is contemplating a trip to the old country this summer. He is sailing on the "Duchess of Athol" from Montreal on April 30th.

A number of relatives and friends from Nanton, Calgary and Didsbury gathered at the home of Mr. and Mrs. Chris. Mack on Sunday to celebrate the latter's birthday.
